INTRODUCTION

Facilities for early childhood education present a unique and difficult problem for those involved with their design. Aids to the solving of this problem in terms of research and literature available are scarce in relation to the complexity of the requirements of these facilities. The following bibliography represents a compilation of articles, books and research papers which have dealt with facilities of education for children of kindergarten and earlier ages.

Due to certain limitations it was not possible for the bibliographer to review all the articles listed. Each indexed reference source is followed by an alphabetical listing of descriptors which were selected to describe the subject elements of each document. Major descriptors are the most important descriptors assigned to a given document and are identified by an asterisk. The descriptors used throughout this bibliography are part of the Thesaurus of ERIC Descriptors, which is used for indexing, storing, and retrieving documents handled by the ERIC system.
